Product Features

Top Product Features

- Twelve unique lumen packages
- Full frost lens for ideal LED aesthetics
- Three correlated color temperatures (3500K, 4000K and 5000K)
- Typical 85 plus CRI
- Class 2, 24V DC constant driver with standard 0-10V dimming
- Options to meet Trade Agreements Act requirements

Notes (4) With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. (6) No integral emergency for 2 ft. models. (9) Used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others). ETRD option requires one relay when used on a dimming fixture.		Notes (7) Only available in 4 ft. models. (8) Step dim and DALI only available in 3600, 4000, 4400 and 4800 lumen packages.

Product Specifications

Construction

- Housing consists of die formed cold rolled steel with decorative white opaque injection molded end plates
- Reflector/channel wireway cover secured by fasteners for easy wireway access
- Channel back has numerous KO's for easy installation

Controls

- Equipped standard with a 0-10V continuous dimming driver that works with any standard 0-10V control/dimmer
- Dimming range is 10% to 100%; varies by control device
- Combine with energy saving products like occupancy sensors, day lighting controls, and lighting relay panels to maximize energy savings

Electrical

- Long-Life LED system coupled with electrical driver to deliver optimal performance
- LED's available in 3000K, 3500K or 4000K with a typical CRI 85
- Projected life is 60,000 hours at 70% lumen output. Electronic drivers are available for 120-277V applications.
- A 0-10V dimming driver is standard

Emergency Battery Pack Option

- Optional 120V-277V integral emergency battery pack is available in 7-watts or 14-watts to meet critical life-safety lighting requirements
- The 90-minute batteries provide constant power to the LED system, ensuring code-compliance
- A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction
- Emergency/generator transfer relay with dimming control capability available

Finish

- Highly reflective post painted finish (PAF) standard offering customers the optimal finish and handling
- Additionally, each housing is treated with multistage iron phosphate pretreatment, ensuring maximum bonding and rust inhibitor

Shielding

- Specially developed LED lens blend allows this product series to offer optimal light out and providing smooth even illumination with no pixilation
- Lenses are designed from smooth opal white acrylic and provide 180° uniform light distribution (Uplight, Frontal & Downlight)
- Lens is securely held in place by removable decorative injection molded white end plates that can be easily removed for installation and maintenance

Installation

- Fixture may be surface (wall or ceiling) and suspended mounted
- See accessories below for ordering information

Compliance

- Modules are UL recognized components and indoor luminaires are cULus listed for up to 40°C ambient environments, RoHS compliant, and LED modules comply with IESNA LM-79 and LM-80 standards.
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
