1-1802 8LT	8-Lamp Harness with Un-Shunted Sockets and Quick Disconnect (8" Black and White/24" Fuse Holder/24" W to Quick Connect)

SHORT ROTARY LOCK MEDIUM BI PIN SNAP IN W/ NIB

HH Fluorescent & LED Products now offers UL certified pre-wired LED Harness sets. Our TLED retrofit kits will save a lot of time and effort which equals money in your pocket. We offer these with or without an in-line fuse for extra protection. All of the products we use are UL approved components.

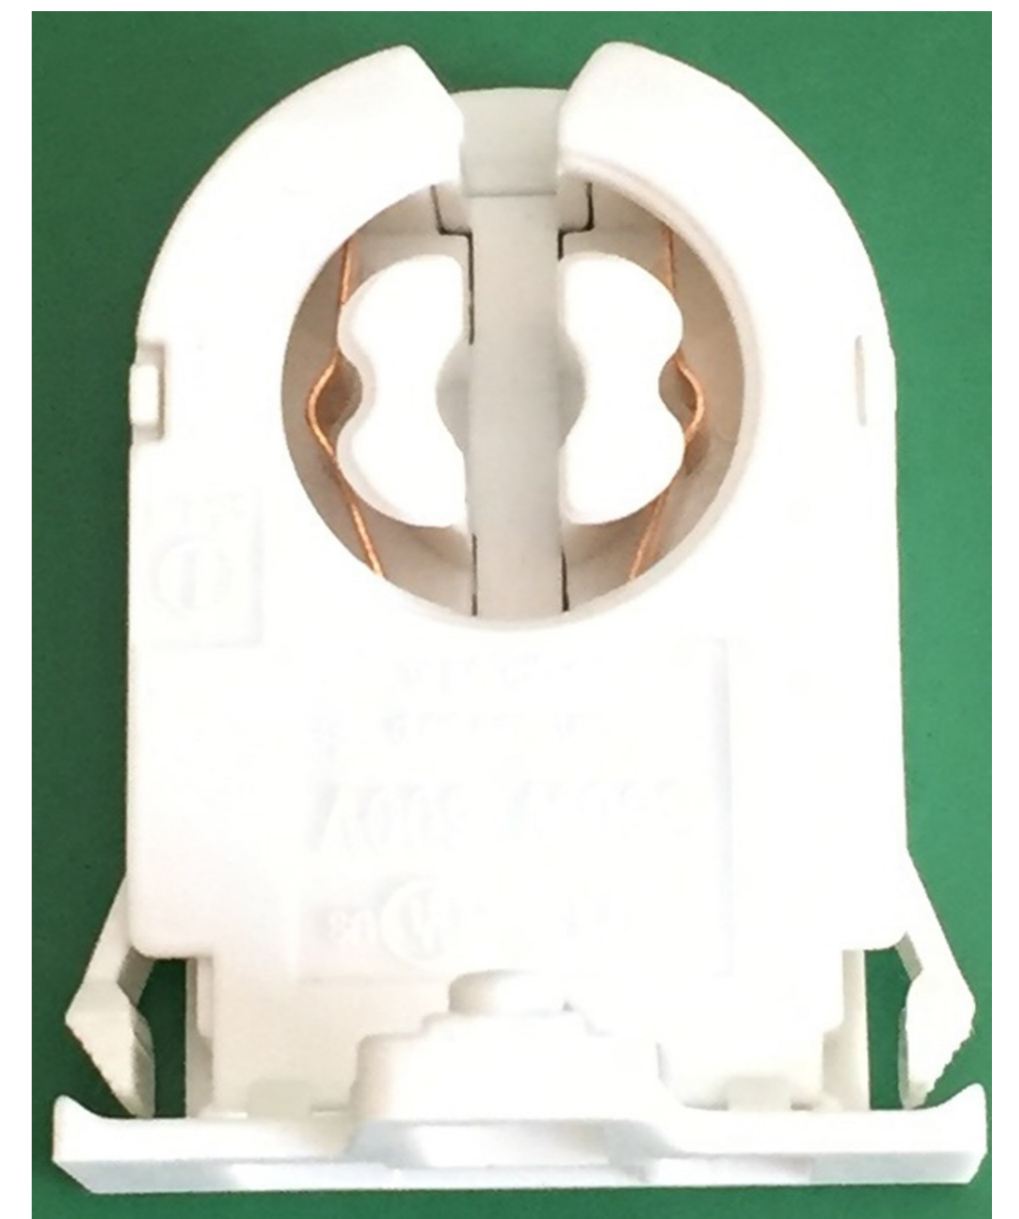

Since HH is a manufacturer of Fluorescent & LED sockets we can offer these Harness sets with a wide variety of sockets to adapt to any application that you may run into in the field. We offer 1,2,3,4,6 and 8 lamp Harness sets with or without a Wago 873-902 quick connect.

We offer the in-line fuse option because it will protect the fixture in case someone was to replace an LED tube with a Fluorescent by mistake and reduces the risk of fire from direct contact of LED tubes to line voltage.

No matter what the application calls for we have the proper sockets. We assemble single end Harnesses as well as double end Harness sets in the USA. Our ability to wire these in the USA greatly reduces lead times but more importantly helps create jobs in our country.

We have been manufacturing sockets for the Lighting Industry for 69 years and continue to offer the most superior sockets in the industry.

We will have cut sheets available shortly. If you have any questions, please feel free to contact one of our sales associates at 215 379-2750.
