Introduction

The HLF LED Flood family offers maximum versatility for high output floodlighting design and renovation applications. HLF precision optics offer vast design capabilities while delivering significant energy savings and long life. The HLF1 delivers 25,000 to 50,000 lumens allowing it to replace 400W and 1000W HID floodlights.

The HLF features an adjustable integral slipfitter that allows the luminaire to be mounted on a 2-3/8" OD tenon. Integral cover/wire box serves as an approved splice compartment allowing for fast, easy mounting and wiring without opening the electrical compartment. A steel yoke mount with water-tight SO cord is also available. All configurations are made in North America allowing for quick delivery.

NOTES

1. MVOLT driver operates on any line voltage from 120-277V.
2. Single fuse (SF) requires 120, 277 or 347 voltage option. Double fuse (DF) requires 208, 240 or 480 voltage option.
3. For units with a photocontrol receptacle, the mounting must be restricted to $\pm 45^\circ$ from horizontal aim per ANSI C136.10-2010.
4. Compatible with standard twist-lock photocells for dusk to dawn operation or advanced control nodes that provide 0-10V dimming signals. Wire 4/Wire 5 wired to dimming leads on driver. Wire6/Wire7 capped inside luminaire.
5. Not available with option PER7.
6. Can be ordered separately as an accessory. Requires in-field assembly. Guards and visors limited to one accessory type installed on lens frame at any given time.
7. Requires luminaire to be specified with PER7 option. Ordered and shipped as a separate line item from Acuity Brands Controls.

FEATURES & SPECIFICATIONS

INTENDED USE

The contemporary design of the HLF LED High Lumen Floodlight embodies high performance LED technology with precision optics offering maximum versatility in designing for high output lighting applications. The HLF1 delivers 25,000 to 50,000 lumens. It is ideal for commercial applications including new construction or replacing 400W to 1000W HID floodlights. HLF may be used for lighting large signage, monuments, large building facades large yards, recreational sports fields and many other commercial applications.

CONSTRUCTION

The HLF LED floodlight features rugged die-cast aluminum construction with integral heat sink fins that optimize thermal management through conductive and convective cooling. A die-cast isolated driver compartment protects LED drivers that are mounted in direct contact with the casting away from the LED heat source, to promote low operating temperature and long life. Integral adjustable slipfitter mounts on a 2 3/8" OD tenon. The adjustable slipfitter has an integral junction box for easy installation. The heat sink, housing, lens frame and driver compartment are sealed against moisture and environmental contaminants to IP66. HLF1 is 1.5G vibration rated per ANSI C136.31.

FINISH

Exterior parts are protected by a zinc-infused Super Durable TGIC thermoset powder coat finish that provides superior resistance to corrosion and weathering. A tightly controlled multi-stage process ensures superior adhesion as well as a minimum finish thickness of 3 mils. The result is a high-quality finish that is warrantied not to crack or peel.

COASTAL CONSTRUCTION (CCE)

Optional corrosion resistant construction is engineered with added corrosion protection in materials and/or pre-treatment of base material under super durable paint. Provides additional corrosion protection for applications near coastal areas. Finish is salt spray tested to over 5,000 hours per ASTM B117 with scribe rating of 10. Additional lead-times may apply.

OPTICS

HLF features both specular aluminum and silicone based "hybrid" type optics that are engineered for superior field-to-beam ratios, uniformity, and spacing. Seven photometric distributions are available including wide pattern distributions Wide Flood, Medium Flood, and narrow pattern distributions Medium Narrow Flood, Narrow Flood, Spot and Narrow Spot. Optional visors minimize uplight and reduce light trespass.

ELECTRICAL

Light engines consist of chip-on-board (COB) LEDs directly coupled to the housing to maximize heat dissipation and promote long life. LED lumen maintenance is >L86/60,000 hours for WFL/MFL optics and >L85/60,000 hours for Hybrid optics. CCT's of 3000K, 4000K, and 5000K (minimum 70 CRI) are available. Class 1, continuous dimming 0-10V drivers. 90% and THD <20%. Serviceable 10kV surge protection device meets a minimum Category C low operation (per ANSI/IEEE C62.41.2).

CONTROLS

HLF features an optional NEMA twist-lock 7-pin photocell receptacle that is compatible with standard twist-lock photocells for dusk to dawn operation or advanced control nodes that provide 0-10V dimming signals. Standard wiring will be per following: Wire 1/2/3 as normal (hot input, switch leg and neutral). Wire 4/Wire 5 wired to dimming leads on driver. Wire 6/Wire 7 capped inside luminaire.

INSTALLATION

The die-cast integral "IS" mount features an adjustable slipfitter that mounts on a 2 3/8" OD tenon and features a 0° to 185° full range tilt adjustment in 5° increments. The slipfitter has an integral junction box and offers easy installation, wiring and precision distribution pattern aiming. A steel yoke "YK" mount (die-formed 1/4" thick plate steel) is available and includes a water tight cord grip and cord. HLF features a glass lens enclosure that is protected to IP66 and is rated for lighting aimed up above 90°. Suitable for mounting within 4 feet of ground.

LISTINGS

CSA Certified to meet U.S. and Canadian standards. Suitable for wet locations. Rated for -40°C minimum ambient. DesignLights Consortium® (DLC) qualified product. Not all versions of this product may be DLC qualified. Please check the DLC Qualified Products List at www.designlights.org/QPL to confirm which versions are qualified.

WARRANTY

5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty/terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.
