Product Features

Top Product Features

- Compact, lightweight design for ease of installation
- Available in 7 lumen packages up to 36,000 lumens
- High-Performance efficacy up to 152 lm/W
- Occupancy and daylight sensor for added savings
- Lumen Maintenance – L88 at 60,000 hours
- Industry leading optics in narrow, medium, and wide distribution
- 0-10V Dimming driver standard
- Options to meet Buy American and other domestic preference requirements

<p>Notes</p> <p>(19) Refer to ambient ratings chart for specific ambient limits per lumen package and options. (19) Deco shield can be used up to 24,000 lumens (40°C temp.). (20) The accessory Loop Hanger shall be utilized only as a secondary safety and not the primary means of mounting. (21) Reflectors not compatible with sensor options. (22) All lenses must be combined with and attach to a reflector. Lenses do not attach directly to the fixture. (23) Uplight kit not compatible with SA23 Shroud, WG17 or WG22 wireguards. (24) Accessories sold separately will be separately analyzed under domestic preference requirements. Consult factory for further information.</p>

Product Specifications

Construction

- Rugged and durable die-cast aluminum lower housing protects LED components for optimal performance
- Heavy gauge CRS upper driver housing provides durability and thermal control
- Suspension mounting with various mounting options

Electrical

- Long-Life LED system coupled with electrical driver for optimal performance
- LED's available in 3500K, 4000K and 5000K with a CRI \geq 80
- Electronic drivers are available for 120-277V, 347V and 480V applications
- 0-10V dimming control (standard)
- Optional Digital Addressable Lighting Interface (DALI) drivers for use with Fifth Light controls
- Operating temperature of -40°C to 55°C (with 0-10V driver). Refer to chart

Optics

- Proprietary discrete, low-brightness LED module assembly
- Precision designed, high-impact polycarbonate optics deliver even illumination
- Offered in Narrow, medium and wide distributions
- Performance options include a low-profile optical shroud

Controls

- Integral occupancy sensor option provides 1200 sq. ft. of coverage in a maximum mounting height of 30'
- Enlighted wireless sensor system option
- Integrated Wavelinx Wireless Sensor option provides 1200 sq. ft. coverage
- WaveLinx wireless enabled (does not include sensor)

Finish

- Standard white polyester powder coat finish painted after fabrication provides increased durability and rust inhibition

Compliance

- cULus listed for damp locations
- IP65 rated optics
- RoHS compliant
- LED modules comply with IESNA LM-79 and LM-80 standards
- DesignLights Consortium® Qualified and classified for both DLC Standard and DLC Premium (refer to www.designlights.org for details)

Warranty

- Five year warranty standard.

Modular Power Supply Option

1. Modular Power Supply Receptacle supplied mounted into fixture Access Plate.
2. Modular Power Cord & Plugs in 120, 277, 347, & 480V configurations for easy plug & power into existing supply.

Cooper Lighting Solutions' Modular Power Supply option is available for use with the SSLED. The modular power supply allows external fixture access for safe and easy servicing. Access to the individual fixture's power supply allows servicing without turning off all the fixtures disrupting occupants. Cooper Lighting Solutions' Modular Power Supply is a time saver in installation – **simply plug & power.**

Energy Data

Input Watts:
9 (9,000 lumens)=64W
12 (12,000 lumens)=85W
15 (15,000 lumens)=111W
18 (18,000 lumens)=134W
24 (24,000 lumens)=190W
30 (30,000 lumens)=266W
36 (36,000 lumens)=334W

SSLED-LD5-24	19 lbs.
SSLED-LD5-30	19 lbs.
SSLED-LD5-36	19 lbs.

Control Systems

- WaveLinx
- DLVP
- iLumin Plus

Integrated Sensor

The Steeler LED with Integrated Sensor technology provides automatic energy savings without sacrificing performance. Traditionally these types of energy savings required coordination between the luminaire and a lighting control system. The Steeler LED delivers superior lighting with integrated occupancy and daylighting controls.

Capture the benefits of traditional lighting controls, without complicated coverage planning or special wiring. Ideal for new construction or retrofit the Steeler LED delivers automatic ON to an energy saving light level, while turned OFF when the space is unoccupied.

Occupied light levels and unoccupied light levels can be adjusted using the integrated sensor programming remote (Catalog Number: ISHH-01). The integrated sensor personal remote (Catalog Number: ISHH-02) provides code compliant manual raise, lower, ON, OFF control.

The Steeler LED with Integrated Sensor is easy to install with no special wiring and ensures energy savings out-of-the-box with default control settings.

How it works:

- As the user enters the space controlled by the integral sensor, the lighting turns ON to full light output. This can be changed using the optional remote.
- Lighting will remain at that the occupied level until the space is unoccupied. This will start the occupancy timeout period (default 20 minutes).
- If the space remains unoccupied for half of the timeout period, the lighting will automatically reduce to the Energy Saver light level. This adjustable light level is typically half of the occupied level.
- At the end of the timeout period the lighting will go to the unoccupied light level. This adjustable light level uses the OFF default setting.

Systems comparison chart

Cooper Lighting Solutions provides many lighting system solutions designed to satisfy code requirements and meet the unique needs of any project.
